

Imaging in Medicine

April 2013 *Imaging in Medicine* 5(2)

EDITORIALS

- 91 **Harnessing advances in structural MRI to enhance research on Parkinson's disease**
DA Ziegler & JC Augustinack
- 95 **Marriage of CT and MRI for vulnerable plaque characterization**
G Wang, F Liu, F Liu, G Cao, H Gao & MW Vannier
- 99 **Why radiologists need to care**
RB Gunderman & AS Rattan

NEWS & VIEWS

- 103 **News**
- Seven signs could help rule out pediatric CT in traumatic abdominal injuries
 - CT texture analysis could predict prognosis in esophageal cancer
 - New technology developed to improve reviewing images during surgical procedures
 - White matter hyperintensities volume associated with Alzheimer's disease
- 107 **Research Highlights**
Highlights from the latest articles in multiple sclerosis MRI
E Sbardella & V Tomassini
- 111 **Interview**
Understanding schizophrenia and traumatic brain injury with MRI
M Shenton

CONTRAST AGENT EVALUATION

- 119 **^{99m}Tc-tilmanocept for lymphoscintigraphy**
CA Puleo, C Berman, JL Montilla-Soler, JS Zager & VK Sondak

REVIEWS

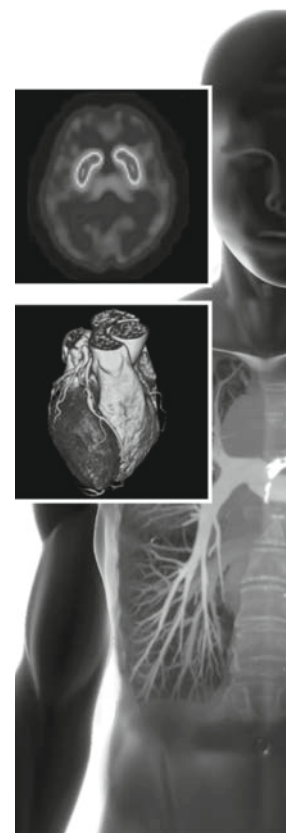

- 127 **Managing incidental cystic lesions in pancreatic imaging: challenges for the radiologist**
C Triantopoulou & C Dervenis
- 139 **Automated breast ultrasound: a novel approach to screening women with dense breasts**
MJ Lenihan & RF Brem
- 147 **Hybrid techniques for intraoperative sentinel lymph node imaging: early experiences and future prospects**
DDD Rietbergen, NS van den Berg, FWB van Leeuwen & RA Valdés Olmos

PERSPECTIVES

- 161 **Will CT colonography improve colorectal cancer screening compliance?**
MN Damiano & BD Cash
- 177 **Is there a place for ultrasound in neuraxial anesthesia?**
S Brinkmann, G Germain, A Sawka, R Tang & H Vaghadia
- 187 **Percutaneous therapy versus surgery in chronic back pain: how important is imaging in decision-making?**
AD Kelekis & D Filippiadis

APPENDICES

- 197 **Acknowledgements**
- 198 **Author Guidelines**

Forthcoming articles

- *Structural neuroimaging for epilepsy surgery*
- *Neuromuscular imaging in muscular dystrophy and other inherited muscle diseases*
- *Computer-aided detection systems for pulmonary nodule identification*
- *Intraoperative imaging techniques for sentinel node scintigraphy in breast cancer*
- *Unenhanced CT in the evaluation of renal colic*
