Our complete Author Guidelines are available at www.futuremedicine.com.

**Audience**
The audience for Future Medicine titles consists of clinicians, research scientists, decision-makers and a range of professionals in the healthcare community.

**Submission**
We accept unsolicited manuscripts. If you are interested in submitting an article, or have any queries regarding article submission, please contact the Journal Development Manager directly (l.dormer@futuremedicine.com). For new article proposals, the Editor will require a brief article outline and working title in the first instance. We also have an active commissioning program whereby the Editor, under the advice of the Editorial Advisory Panel, solicits articles directly for publication.

**Peer review & revision**
Once the manuscript has been received in-house, it will be peer-reviewed (usually 2–3 weeks). Following peer review, 2 weeks is allowed for any revisions (suggested by the referees/Editor) to be made.

**In-house production**
Following acceptance of the revised manuscript, it will undergo production in-house. Authors will receive proofs of the article to approve before going to print, and will be asked to sign a copyright transfer form (except in cases where this is not possible, i.e., government employees in some countries).

**Article types**
For a more detailed description of each article type, please view our author guidelines at: www.futuremedicine.com

**Reviews**
Reviews aim to highlight recent significant advances in research, ongoing challenges and unmet needs.

- **Introduction**
- **Patients & methods/Materials & methods**
- **Results**
- **Discussion**
- **Conclusions**
- **Summary points**
- **References**
- **Reference annotations**
- **Financial disclosure**

**Perspectives**
Word limit: 4000–8000

Perspectives should be speculative and very forward looking, even visionary. They offer the author the opportunity to present criticism or address controversy. Authors of perspectives are encouraged to be highly opinionated. The intention is very much that these articles should represent a personal perspective. Referees will be briefed to review these articles for quality and relevance of argument only. They will not necessarily be expected to agree with the authors’ sentiments.

**Special reports**
Word limit: 1500–3000

Special reports are short review-style articles that summarize a particular niche area, be it a specific technique or therapeutic method.

**Editorials**
Word limit: 1000–1500

Editorials are short articles on issues of topical importance. We encourage our editorial writers to express their opinions, giving the author the opportunity to present criticism or address controversy. The intention is very much that the article should offer a personal perspective on a topic of recent interest.

**Priority paper evaluations**
Word limit: 1500

Priority paper evaluations review significant, recently published primary research articles carefully selected and assessed by specialists in the field (not a paper from the author’s own group). The primary research detailed in the chosen paper is discussed with the aim of keeping readers informed of the most promising discoveries/breakthroughs relevant to the subject of the journal through review and comment from experts.

**Conference scenes**
Word limit: 1500

Conference scenes aim to summarize the most important research presented at a recent conference in the subject area of the journal.

**Company profiles**
Word limit: 2000

Company profiles allow representatives from pharmaceutical, biotechnology, etc. companies to describe the work currently being carried out within their particular organization, relevant to the field of the journal in question.

**Executive summary**

Executive summaries should be bulleted summary points that illustrate the main topics or conclusions made under each of the main headings of the article.

**Conclusion**

A speculative viewpoint on how the field will evolve in 5–10 years time.

**References**

References should be numerically listed in the reference section in the order that they occur in the text.

**Key formatting points**

Please ensure your paper concurs with the following article format:

- **Title**: concise, not more than 120 characters.
- **Author(s) names & affiliations**: including full name, address, phone & fax numbers and e-mail.
- **Abstract/Summary**: approximately 120 words. No references should be cited in the abstract.
- **Keywords**: approximately 5–10 keywords for the review.
- **Figure/Table legends**: summary of each figure/table should be included.
- **Figures, tables & boxes**: Summary figures, tables and boxes are very useful, and we encourage their use in reviews/perspectives/special reports. The author should include illustrations and tables to condense and illustrate the information they wish to convey. Commentary that augments an article and could be viewed as ‘stand-alone’ should be included in a separate box. An example would be a summary of a particular trial or trial series, a case study summary or a series of terms explained.

**Abbreviations**

Abbreviations should be clearly defined on their first appearance, and in any table and figure footnotes. It is helpful if a separate list is provided of any abbreviations.

**Spelling**

US-preferred spelling will be used in the final publication.

**Manuscript preparation**

**Spacing & headings**

Please use double line spacing throughout the manuscript. No more than four levels of subheading should be used to divide the text and should be clearly designated.

**Correspondence**

Abbreviations should be defined on their first appearance, and in any table and figure footnotes. It is helpful if a separate list is provided of any abbreviations.

**Spelling**

US-preferred spelling will be used in the final publication.

**Figures, tables & boxes**

Future Medicine has a charge for the printing of color figures (i.e., each color page) in the print issue of the journal. We have no page charges and aim to keep our color charge to a minimum. The charge does not apply to the online version of articles, where all figures appear in color at no charge.

**Copyright**

If a figure, table or box has been published previously (even if you were the author), acknowledge the original source and submit written permission from the copyright holder to reproduce the material where necessary.

As the author of your manuscript, you are responsible for obtaining permissions to use material owned by others. Since the permission-seeking process can be remarkably time-consuming, it is wise to begin writing for permission as soon as possible.

Please send us photocopies of letters or forms granting you permission for the use of copyrighted material so that we can see that any special requirements with regard to wording and placement of credits are fulfilled. Keep the originals for your files. If payment is required for use of the figure, this should be covered by the author.
