

# Diabetes Management

Linpin Kao

Diabetes Management presents findings, analysis and commentary on the battle with Type I and Type II diabetes. Articles published in Diabetes Management address improvements in current therapeutics and patient compliance together with perspectives on future prospects. Coverage focuses on the key objective of stabilizing blood glucose levels in individuals with either form of the disease, and the associated issues of patient co-operation and education. The journal also reflects the frontiers of current research, such as attempts to recreate pancreatic cells through stem cell technology or islet cell transplantation, the development of a vaccine for Type 1 disease and the potential for biomarkers to be used for the detection. The increasing understanding of the molecular basis of the disease and associated genetics will play an important part in future diabetes management.

All published articles of this journal are included in the indexing and abstracting coverage of China National Knowledge Infrastructure (CNKI), Chemical Abstracts Service (CAS), WorldCat, Secret Search Engine Labs. During the calendar year 2019, Journal received a total of 19 manuscripts, out of which 4 articles were rejected in the preliminary screening due to plagiarism or being out of the format and peer review process. Globally articles have been accessed by the research scientists and also cited. During the calendar year 2019, a total of three Editors, six reviewers joined the board of DMT and contributed their valuable services towards contribution as well as publication of articles, and their valuable reviewer comments will be beneficial to publish quality of article in the Journal. I take this opportunity to acknowledge the contribution of all Editors: Froguel P (UK), Tuomilehto J (Finland), Ricordi C (USA), Rabindra Nath Das (India), Yusra Habib Khan and other editors also during the final editing of articles published and the support rendered by the editorial assistant: Sarah Elizbeath in bringing out issues in time. I would also like to express my gratitude to (Malaysia) all the authors, reviewers, the publisher, the advisory and the editorial board, the office bearers for their support in bringing out yet another volume and look forward to their unrelenting support to bring out the Volume 10 of DMT in scheduled time.
