

Journal of Pharmaceutical Bioprocessing

The journal has been started in the year 2013 and it released its first volume in the same year. Till now, the journal has released 7 volumes by the end of 2019 and is successfully running its 8th Volume.

The Journal is an open access publication that features scientific works of considerable significance and impact in all fields of Process design, development, scale-up and automation; Production facilities, equipment and the use of disposables; Cell expression systems for biopharmaceutical production; Bioreactors, Upstream and downstream processing; Bio-containment, safety and cGMP processes; Production of recombinant proteins, mAbs, vaccines and cell therapies; Analysis: processing design, process analytics and release criteria; Bioformulation, validation, regulation and patient delivery; Regulatory issues and other areas of debate; Disposable Bioprocessing Systems. It is a boon for researchers and students who wish to be kept abreast of the latest advancements in these fields, it would help them build on the current know-how. Business people, policy makers, journalists, and practitioners can also benefit from the works published in the journal.

Classification of the Journal

Cell expression

Bio-containment

Bioformulation

Disposable Bioprocessing Systems

The classification extends to the above and its related topics too.

Some of the articles released in 2018 are as follows:

1. Isoginkgetin inhibits lipopolysaccharide induced PI3K/AKT pathway through miRNA210 in vascular endothelial cells
2. Comparison of the effect of intravenous and intra-articular injection of tranexamic acid on blood loss in total knee arthroplasty
3. CD146 expression, as a surrogate biomarker for human mesenchymal stromal cell multilineage differentiation, is preserved during cell expansion in an automated hollow-fiber membrane bioreactor
4. The role of hypodermic injection with low dose of adrenaline in emergency treatment of severe asthma

The journal has released the conference details relating to the journal in December 2019.

In the same way, the Journal expects to cover all the above classification topics for the year 2020 along with the present research in this field along with the current situation prevailing in globally i.e., COVID19.

Social media/digital marketing

The journal always was in contact with the scientific group of the world through its mails, social media networks and its digital platforms. Some of the best ways to be in contact with the audiences' are:

1. Twitter postings: Regularly posting the articles, trends, updates of the journal. They can be visible at @Bioprocessing10.
2. Posting Google Analytics data in the website.

3. Using LinkedIn and Facebook for regular updates.
4. Regularly being in contact not only through mails but also through Whats App.

The complete details about the journal can be seen at: <https://www.openaccessjournals.com/journals/pharmaceutical-bioprocessing.html> and for contacting us, mail us or Whats App us.

So, as an Editor, I invite all the extended dignitaries in this field to submit their articles for bringing this research/expertise to the global scientific community.

Regards

Jordan M
