- University of British Columbia
- Seoul National University
- University of Helsinki
- Columbia University
- National Taiwan University (NTU)
- Albert-Ludwigs-Universitaet Freiburg
- University of Florida
- University of Oulu
- University of Washington
- University of Toronto

**Market Overview:**

Poor oral hygiene, stress, diabetes, smoking, and other age-related risk factors are some of the negative aspects of a fast-changing lifestyle. These factors increase the probability of the onset of periodontal diseases. This is expected to have a positive impact on the growth of the global periodontal therapeutics market size.

Lack of awareness about disease symptoms and cure

There is a delay in the diagnosis and treatment for periodontal disease due to the lack of awareness about the symptoms associated with periodontal diseases. Despite its high prevalence, only a small proportion of the affected population seek medical treatment.
This is expected to hinder the growth of the market during the forecast period.

Dental Market Overview

Digital innovations are rapidly transforming the healthcare industry and the global dental market is expected to witness major positive impact from these technological breakthroughs in the coming years. Digital Dentistry technologies like cloud, 3D printing, and several other innovations are all set to trigger the growth of the dental market size especially

Dental Market Insights

The increasing number of cosmetic dentistry and orthodontic treatments will be one of the primary factors that will trigger the growth of the dental implants market. It is expected that factors such as the availability of advanced dental implants, the presence of prosthetic products such as dental crowns, and the increasing investments in R&D for the development of dental implants, will positively impact the growth of the tooth implant segment.

One of the primary drivers for dental imaging is the rising edentulous population coupled with the increasing demand for oral care. Factors such as age, periodontal diseases, dental caries, and other dental conditions are some of the main reasons for this rapid increase in the demand for dental imaging.

The growing prevalence of oral diseases such as tooth decay, chronic bad breath, and periodontal diseases, and bleeding gums are some of the major factors for the dental market's steady growth. Also, the growing number of dental implant procedures and advances in dentomaxillofacial surgeries is driving the market.

The principal categories of the dental products market are dental consumables and dental equipment. The largest geographical markets for dental products are in North America, Europe, and followed by the rest of Asia, Latin America, Africa, the Middle East, and Australia. Expansion of the elderly population worldwide and increasing consumer awareness of oral healthcare needs are propelling the expansion of the global dental market. Among the product segments, the dental implants market will have the fastest market growth. Analysis of the Dental Products Market Of particular note is Dentsply’s merger with Sirona Dental Systems which closed in late February 2016. The $5.4 billion mergers combined Dentsply’s market-leading dental consumables platform with Sirona’s dominant dental technology business. The consolidated company, Dentsply Sirona, will offer the most products and technological solutions within the global dental products market and is expected to generate more than $125 million in cost-savings synergies over the next three years. It is estimated that the demand for dental care treatment will increase significantly in the coming decade. The large demand for treatment, as well as the growing economy, means more care with better services and facilities will be needed, providing opportunities for the private sector. The current private market consists of many small clinics, which offers a big opportunity for major chains with a reputation for quality.

In 2018, the Global Dental Market size was 26000 million US$ and it is expected to reach 40500 million US$ by the end of 2025, with a CAGR of 5.7% during 2019-2025.
