

A list of all abbreviations and terms appearing in this issue of *Therapy*.

ABPM	Ambulatory blood pressure monitoring	ILAE	International League Against Epilepsy	p.o.	Orally
ACE	Angiotensin-converting enzyme	IRR	Incidence rate ratio	PPD	Purified protein derivative
AED	Antiepileptic drug	JME	Juvenile myoclonic epilepsy	PPI	Proton pump inhibitor
ALT	Alanine aminotransferase	KD	Ketogenic diet	PR	Partial response
ARB	Angiotensin receptor blocker	LCT	Long-chain triglyceride	PT	Prothrombin time
ART	Antiretroviral treatment	LEV	Levetiracetam	PUD	Peptic ulcer disease
ARV	Antiretroviral	LGS	Lennox–Gastaut syndrome	q.i.d.	Four times a day
ATI	Antibodies to infliximab	mAbs	Monoclonal antibodies	RCC	Renal cell cancer
b.i.d.	Twice a day	MAPK	Mitogen-activated protein kinase	RCT	Randomized controlled trial
BAL	Bronchoalveolar lavage	MRI	Magnetic resonance imaging	RDA	Recommended daily allowance
BMI	Body mass index	MST	Median survival time	RDR	Relative dose response
CBZ	Carbamazepine	N/A	Not applicable	RECIST	Response Evaluation Criteria in Solid Tumors
CD	Crohn's disease	NAFLD	Nonalcoholic fatty liver disease	RTK	Receptor tyrosine kinase
CHF	Congestive heart failure	NAS	NAFLD activity score	SCLC	Small-cell lung cancer
CI	Confidence interval	NASH	Nonalcoholic steatohepatitis	SD	Disease stabilization
CIM	Current infection marker	NSAID	Nonsteroidal anti-inflammatory drug	sdNVP	Single-dose nevirapine
CR	Complete response	NSCLC	Non-small-cell lung cancer	SEER	Surveillance Epidemiology and End Results
DASH	Dietary Approaches to Stop Hypertension	o.d.	Once daily	SLE	Systemic lupus erythematosus
DDW	Digestive disease week	OR	Odds ratio	t.i.d.	Three-times a day
DEW-IT	Diet, exercise and weight loss	OXC	Oxcarbazepine	t _{1/2}	Half-life
ECP	Eosinophil cationic protein	PCDAI	Pediatric Crohn's Disease Activity Index	TPM	Topiramate
EEG	Electroencephalogram	PCP	Primary care provider	TPN	Total parenteral nutrition
EPX	Eosinophil protein X	PD	Progressive disease	TSC	Tuberose sclerosis complex
ERK	Extracellular signal-related kinase	PEAK	Prevention of Early Asthma in Kids	UBT	Urea breath test
GTP	Guanosine triphosphate	PFS	Progression-free survival	UDCA	Ursodeoxycholic acid
HAART	Highly active antiretroviral therapy	PHB	Phenobarbital	VEGF	Vascular endothelial-derived growth factor
HFF	Hepatic fat fraction	PHT	Phenytoin	VGB	Vigabatrin
HIF	Hypoxia-inducible factor	PI3-K	Phosphatidylinositol 3-kinase	VNS	Vagus nerve stimulation
IBD	Inflammatory bowel disease	PMTCT	Prevention of mother-to-child transmission	VPA	Valproate
IL	Immunoliposome			yo	Years old
IL	Interleukin			ZNS	Zonisamide
