

Innovation in healthcare issues and future trends

Abstract

Despite the fact that there have been significant improvements in the healthcare industry, inefficiency still exists and little accomplished in understanding how to overcome those inefficiencies using innovation in healthcare. This presentation seeks to answer the following research questions. • What are the most disruptive issues in healthcare? • Healthcare Management challenges and current innovations. • How do executives and practitioners define the term innovation in healthcare? • How do healthcare organizations come up with innovative ideas and how do they make those innovative decisions? • What strategies do these organizations apply towards the formulation of innovative decisions? • How to do Healthcare management disseminate this innovation to healthcare provider/practitioner, and measure effectiveness. • What role does information technology play in the innovative process? • Future Trends in Healthcare Technology that Revolutionize Patient Care and Management.
