

Scientific quest to enhance the fascinating & mystified Neurons

Harish C. Pant

NINDS, NIH, USA

Neurology Conference 2019 will be focus destination for the International Neurology Research Societies, Associations, and Organizations. This event will bring together Neurologists, Directors, Neurosurgeons, Head of the department, Psychiatrists, Professors, Students from academia and researchers in the field of Neurosciences, Government officials and global leaders to push forward the Neurology department. Importance and Scope: The 18th International Conference on Neurology and Neurological Disorders is a unique platform which will bring together global leaders in the field of Neuroscience from around the world to Paris, France. We will witness distinguished academicians in the field of neuroscience and neurology, public health professionals, Brain researcher's, scientists, academic scientists, industry researchers, scholars to exchange about state of the art research and technologies. The aim of this conference is to generate new ideas for better treatment in a convenient manner that will be beneficial throughout the world. This conference will host workshops, symposiums, and other events which will help to exchange new research and ideas about Neuroscience and its other branches. Why Paris: Paris is the most populous city in the France. There are about 15 Universities in and around Paris which are working in the field of Neurology and Neuroscience. 1000's of neurologists, psychiatrists, and neurosurgeons are working exclusively on Neurological disorder in Paris. There is a great scope of Neurology and its research in Paris, France. Paris offers a rich, cultural landscape of France. You will find yourself dazzled by the cuisine, the dancing, the art, and the music. Thousands of people take their holiday in France every year to enjoy the wine and the relaxed lifestyle. Why to attend? The 18th International Conference on Neurology and Neurological Disorders is a unique platform which aims to discuss and generate new ideas for treatment and management of Neurological Disorders. Neurology 2019 will witness an assembly of experts from all over the world who will present their cutting edge research for the betterment of Neurological health. Other Reasons: · Gathering of world class researchers and budding talent from across the globe. · Showcase your research and get world recognition. · Avail chances to interact with world renowned scientists. · Perfectly designed schedule: Workshop, Expo areas, brainstorming sessions and many more. Platform to network with fellow primary care clinicians. Educational workshops on diagnosis and treatment of neurological diseases. There are opportunities for sponsorship and exhibition at this conference: Major Associations around the Globe: · Neuropathy Association · The brain & behavior research foundation · Alzheimer's Association · American Academy of Neurology · European Neurological Societies · World Federation of Neurology · Spanish Society of Neurology · Major Neurological Associations in Italy · Hilarascere Foundation in Italy · Italian MS society in Italy · Southern Clinical Neurological Society · ESNR European Society of Neuroradiology · Vision sciences society Target Audience: Neurologists, Directors, Neurosurgeons, Head of the department, Psychiatrists, Professors and Students from academia and researchers in the field of Neurosciences. Target Audience: (By Percentage) · Academia: 60% · Industry: 30% · Others: 10% Market Research in Neurology: According to WHO 2013, globally the disorder is prevalent in about 7 persons per

1,000 of the adult population ages 15–35 years. With reference to recent WHO report it is estimated that in 2022, the US will have the maximum number of diagnosed predominant cases of schizophrenia with 1,777,333 cases, followed by Japan with 454,961 diagnosed predominant cases, and Italy with 154,331 diagnosed predominant cases. In America currently, around 5.4 million are diagnosed with Alzheimer's disease. The American Alzheimer's Association projects that the number will triple to 16 million by the year 2050 As per WHO, 26 African countries in sub-Saharan Africa are known as Meningitis belt and transmit maximum epidemic risk. Globally, the disease has triggered an assessed 700,000 cases and 70,000 deaths over the past 10 years. According to Alzheimer's Association with the costs of dementia and stroke alone projected to total more than \$600 billion by 2030. Every year \$1.8 billion is funded for cancer research. According to a global study conducted by the World Health Organization, 8 out of 10 disorders in the 3 highest disability classes are neurologic problems. The market analysis of neurology represents the largest and untouched market in the medical sector. This estimated market analysis is based on the probability of approval and sales of products in late stage development, demographic trends, and marketing of the product. Emerging markets once again helps to boost revenues. CNS therapeutics and diagnostics comprise approximately 15% of total pharmaceutical sales which is nearly \$30 billion across the world. Estimated annual economic costs of anxiety disorders, depression and schizophrenia are \$47 billion, \$44 billion, and \$33 billion per year respectively. The goal of this Neurological meet is to understand the market Value & Growth of Neurology disorder, Neurological Drug, Current economics cost of clinical research and development. According to latest market analysis, it is forecast that Global Neurology Endoscopy Devices Market is projected to show growth of at 7.20% CAGR during the period 2017-2021. Around 500 top universities globally working in the field of Neuroscience · Dalhousie University · Leiden University- Neither land · Temple University USA · University Oklahoma · Boston Coll USA · Florida International University · University California – Davis · University Sheffield · University Manchester · University of Nottingham · Cardiff University · University of Toronto – Canada Hospitals Associated with Neuroscience Research All around the globe, there are 6000 hospitals working on Neurology. Some of them are: · Johns Hopkins Hospital · World Brain Center Hospital · Duke University Hospital · Edward Hospital · Munson Medical Center
