

# Enlightening the new horizons in Pediatric and Neurology

**Gary B Melton**

University of Colorado Anschutz Medical Campus, USA

Advanced Neurology Conference 2021 declares a whole hearted solicitation to all the participants, students, attendees and business delegates from all over the world to Vienna, Austria. Delighted to welcome you to 4th World Congress on Neurology and Therapeutics during October 25-26, 2021 in Vienna, Austria.

Advanced Neurology Conference 2021 aims to congregate the Neurologists, Neurophysiologists, Neurosurgeons, psychiatrists, physiatrists, Pharmacists, Research scientists, Neurology Organizations and Neurology societies, Professors and Students from Academia and even from business delegates across the world to provide an international rostrum for the dissemination of original research, novel ideas and practical development experiences. This year's event will be sure to have a meaningful experience witnessing with scholars from around the world.

It's all worth to know about our Neurology Conference <http://neurology.pulsusconference.com/>

## Importance and Scope:

The Neuroscience market in our neurology conferences aims to understand the functioning and manipulation of nervous system, how one's brain mechanism works, understands, reacts and complex neuronal circuits based on ongoing research on brain mapping sessions and investigation projects.

The demand for such research in our neurology conferences is due to the increase of various nervous disorders including Parkinson's disease, Alzheimer's disease and inherited genetic disorders and another reason is the lack of research unity towards the healthier world.

This Meeting strategic astuteness is to be an event for bringing together Scientists, Physicians, International mix of leading department of neurology and neuroscience in Universities, Alzheimer's and Dementia Institutions, on growing welfares for Neurological Impairments to transform the practices, to prevent, to control and cure these neurological diseases in our neurology conference.

## Glance at Market Share:

According to WHO, it has been reported that about one billion of people are suffering from worldwide neurological impairments and 6.8 million people die every year suffering from it.

According to the UN report: nearly one in six of the world's population suffer from neurological disorders, from Neurological impairments like Alzheimer's, Parkinson disease, strokes, multiple sclerosis and epilepsy to migraine, brain injuries and neuro-infections, with some 6.8 people dying of the maladies each year.

Though there are 600 known neurological disorders which affect our nervous system and our muscular system severely but still for most of the diseases treatment options are very limited and research is going on that are to be discussed in neurology conference. It features board investigations in the Neurology, Neurophysiology and interdisciplinary departments of Neurosciences and many new inclusion of main tracks from our neurology conferences.

By using the global statistics, it's far visible that 50 million people be afflicted by epilepsy, sixty- million people be afflicted by cerebrovascular disease, 3 hundred and twenty-six million human beings suffer from migraine, and twenty-4 million of the population suffer from Alzheimer sickness and other dementias. according to the college of California, San Francisco.

The range of neurological diseases is heading extra than six hundred, out of which maximum of the diseases remedy remains beneath limitations and research continues to be processing and discussed in our meritorious neurology conference. The global Burden of Neurological disorder have a look at, in conjunction with the ongoing worldwide collaborative venture among WHO, the world financial institution and the Harvard college of Public fitness, has come up with the evidence that pinpoints neurological disorders session in neurology conferences are one of the greatest threats to public health.

Current advances in Neurosurgery era have meant that the focal point of remedy for spinal situations has improved closer to protection of normal spinal motion and sparing of structures adjacent to hassle regions. Consistent with the record of the sector fitness enterprise (WHO) on neurology conferences that neurological disorders, ranging from epilepsy to Alzheimer disease, from stroke to headache, affect up to 1Billion of the population worldwide.

## Major Neurology and Neurophysiology Associations around the Globe

- American Clinical Neurophysiology Society
- American Physiological Society
- American Board of Psychiatry and Neurology (ABPN)
- American Neurological Association (ANA)
- American Academy of Neurology
- American Society of Neuroimaging
- American Association of Neurological Surgeons
- Child Neurology Society
- European Federation of Neurological Societies
- Indian Academy of Neurology
- Neurological Society of India

## Target Audience:

Neurologists, Neurosurgeons, Neurophysiologists, psychiatrists, physiatrists, Pharmacists, Research scientists, Neurology Organizations and societies, Pharmaceutical (drug design and discovery) companies, Neuro and CNS drug Industries, Neuroscience associations & foundations, Professors and Students from Academia in the study of Neurology and Neurophysiology and researchers who utilize neurophysiological techniques and knowledge in the diagnosis and management of patients with disorders of the nervous system in our neurology conference.
