Established & Networked & Converted NorthCoast Eureka, CA Market area residents/medical community to the "Walgreens Way" with "Personalized Pharmacist Services/Care" Concept. 5. Received many awards for being unique by SFVA for his clinical successes and so on.

There are many different factors influencing our body's health balance including ancestral genetics, ADM's (Aging Defense Mechanisms), environmental toxins, foods, and herbs ingested, the normal aging process where hormones and cellular ATP (Adenosine triphosphate) gradually decrease over time usually beginning by age 40.

Adenosine triphosphate (ATP) is the energy currency of life and it provides that energy for most biological processes by being converted to ADP (adenosine diphosphate). Since the basic reaction involves a water molecule, $ATP + H_2O \rightarrow ADP + Pi$ this reaction is commonly referred to as the hydrolysis of ATP. This is the cell's powerplant defending the body from disease, maintains the body's ADM balance keeping us young and active. Pharmanex's unique scientifically based anti-aging products are uniquely designed to restore the body's natural balance of cellular ATP reducing our body's inflammation and thus contributes to improving chronic inflammatory diseases like Diabetes by restoring our body's youthful health balance. Our body utilizes antioxidants to protect our cells from the harmful effects of inflammatory free radicals and our body's antioxidant quantities can be measured with HCPN's S3 Biophotonic Scanner to monitor the effectiveness of the Pharmanex's Supplements.

Pharmanex Anti-Aging Supplements

1. AgeLOC Youth This supplement is a unique ingredient blend that is not readily available even from a healthy diet and delivers systemic youth preservation benefits to our body.
2. AgeLOC Vitality As we age, our bodies' ability to effectively generate and utilize energy can decline, robbing us of youthful vitality. ageLOC Vitality improves the three dimensions of vitality-physical vigor, mental acuity, and sexual health-by promoting youthful gene expression patterns associated with vitality.

Through targeting the sources of age-related vitality loss, ageLOC Vitality helps you feel more like you did when you were young. The studies on two products showed improvement in chronic diabetic patients. I personally am a T2D using long-acting insulin twice daily, Glipizide ER 5mg daily, and Sitagliptin 100mg daily. This is my current REDUCED drug regimen since starting Pharmanex's supplements about 1.5 years ago. My current A1c=5.8 with no hypoglycemia and my old A1c=8 which was before Pharmanex's supplements. I hope the information I provide today will help everyone to achieve better body health balance. This is not a one-shot deal. Improving one's health requires multiple measures uniquely designed for each individual as each of us are genetically distinct and there is not one medical treatment for everyone! This is the age of "Precision Medicine" incorporating the different medical modalities including, Asian, Traditional, Alternative, Naturopathic, Acupuncture, and others. This is an effort to reduce adverse drug reactions and patient harm and death from prescribed medications saving lives and money. This is an example of "Precision Medicine".
