

Exploring Recent Researches and Explicating Vascular Dementia for Desirable Health

Tammi C. McGill-Carter

Family Focus, Inc, Valparaiso, In Lake County Medical Reserve Corps, Indiana Autism Society of Indiana, USA

The conference presents new academic awards with distinctive passion for the conference themes for outstanding scholars, outstanding students or early academics. The Award aims to provide early career academics with a good opportunity for professional development — to meet field experts, connect with colleagues from other parts of the world and network

Outstanding Award:

The award to the experts who contributed outstandingly to the advancement of Neuroscience. This is the most prestigious award of the conference, and is known as the Scientific Service Award for Achievement. The qualifying requirement for this award is that you will have at least 20 + years of experience relevant to the public or private sector. The winner will be awarded the award

Excellence Award:

The conference will present the Scholar Level Award for aspiring scientists, scholars, and professionals with 10 + years of academic experience in neurosciences. Our conference aims to provide the best forum to extend your network by sharing your awareness of the on-stage study. Presentation involves 25-30 minutes of oral dialogue on scientific research topics depending on the theme of the conference

Keynote Speaker:

This award honors the best keynote speaker who will be sharing their neuroscience initiatives, methods and schemes to boost long-term success. When the program manager has approved you as a keynote speaker, you can nominate anyone who deserves the award online.

Best Poster Presentation:

The Student Poster Competition is held at the Meeting, to allow students and graduates to present their original work. All accepted abstracts will be addressed at the Poster Sessions during the conference. The Conference Series aims to provide a forum for all budding scientists and researchers to present their work in real time and share their views and topics

This award honors Masters / Ph. D./Post Ph.D. thesis research Presentation that will present their projects and thesis applied in the area of neuroscience to achieve long-term success. You may nominate the deserving award online. Anyone who deserves the award can be nominated online.

The Young Researchers Forum provides the opportunity for young researchers to meet and discuss research topics and methodologies, exchange and develop ideas, learn from each other and gain expertise from senior researchers.

The Vascular Dementia and Dementia Young Researcher Sessions are

designed to provide a unique forum for young researchers to discuss the new research projects.

/Industries to give a brief oral presentation during the Forum. Such oral presentations in linked scientific track should be of 10 minutes length, accompanied by 5 minutes question hour. Hence presenters are encouraged to give absolute and insightful talks. Applications will be chosen based on the feasibility and potential promise of previous work.

At the meeting, the Student Poster Competition is arranged to inspire students and recent graduates to present their original work that will be presented later in the Journals meeting. During the conference all approved abstracts will be discussed in the poster sessions. The main aim of the conference is to set up a forum for all the budding researchers to present their real-time work and share their views and aspects related to the theme of the conference. Meet global stirring experts and speakers at our Dementia treatment 2020 to learn about latest scientific know-how and engineering developments to improve safety and cure and related technologies.

Attending a regional dementia conference involves paying attention to different perspectives and discussing new theories and innovations in you, We hope that Dementia care 2020 will allow you to learn several new information and strategies by listening to other presentations, and that you will also speak to various experts from different universities, institutes and foreign locations that you could only hear about or analyze. Also, give you the opportunity to meet and communicate with scientists and researchers from around the world. Therefore, we hope that all of you will join us and take some time to share your discoveries in the course of Vascular Dementia 2020.
