

Medical dental team education, communications skills

Abstract

Communications Skills is a Training for Medical team to learn how to provide excellent health service for the population. Modern healthcare delivery demands that the religious, cultural and ethical beliefs of patients be considered as a part of their treatment.

Medical-Dental Team Education is the way to promote your team skills, consists of education sessions for all your team staff, Doctors, Dentists, nurses and assistants and the reception to reach the high demand of health care and to build a good relation between the health provider and the patient.

This training helps you to deal with different groups in your country as Multicultural society; the presentation consists of clarifications about how to market well your facility and how to talk with patients.
